

INDEX

- accelerin, 64
- ac-globulin, 64, 72
- afibrinogenemia, 67
- ALLEN, F. H., JR., 162
- anti-cephalin, 70
- anthropometric characters:
 - heritability, 49
 - in twins, 49
- antihemophilic factor (AHF), 64, 69
 - titre of, 70
- atomic radiation, 207
 - genetic aspects, 207
 - β -aminoisobutyric acid, 120
 - urinary excretion, 120
- birth order, 8
- blood coagulation, 63
 - biochemical genetics of, 63
 - Morawitz theory, 63
 - convertibility factors, 64
- blood groups:
 - ABO, 28, 39, 164, 170, 257
 - Fy, 164, 170
 - Jk, 164, 170
 - K, 164, 170
 - Le, 164, 170
 - P, 164, 170
 - Rh, 164, 170
 - in classification of twins, 51
 - mother-child, 257
 - linkage with, 93, 162, 177
 - estimates of frequency of
 - ABO, 28, 39
 - Bernstein's estimates, 29, 40
 - comparison of estimates, 42
 - MN, 26
 - MNS, 31, 229
 - Rh, 33, 80
 - Wiener's estimates, 30, 41
- blue-sclera, 110
- BOYD, W. C., 24
- bone fragility, 110
- cancer
 - breast, 102
 - stomach, 102
 - esophagus, 102
 - uterus, 102
- Christmas factor (PTC), 64, 73
 - disease, 73
- CLARK, P. S., 49
- coeliac disease, 15
- congenital defects, 15
 - heart disease, 15
- consanguineous marriages, 236
 - among Mormons, 236
 - their relations, 236
- cousin marriages, 151, 236
- creatinine concentration, 121
- deaf, 99
- deafness, 110
 - and goiter, 253
- DEGROOT, M. H., 39, 229
- delta method, 26
- DERAEMAERKER, R., 253
- DOOLEY, R. R., 162
- elliptocytosis, 82
- environment:
 - intra-natal, 17
 - post-natal, 18
 - pre-natal, 17
- environmental influence, 8
- esophageal atresia, 15
- estimates, 229
 - efficiency of, 24
 - variance of, 133
 - gene frequency, 133
- eugenics, 97
- factor V, 64, 72
- factor VII (SPCA), 64
- factor X, 64
- fall-out, 221, 225
- fibrin, 66, 67, 68
- fibrinogen, 66, 67, 68
 - activated, 68
 - congenital deficiency of, 69
- fourth thromboplastin component, 64
- GARTLER, S. M., 120
- gene frequency
 - ABO, 133
 - variance estimates of, 24, 133
 - maximum likelihood estimates of, 134, 229
 - Bernstein's estimates of, 135
 - Wiener's estimates of, 136
- genetic counseling, 97
 - psychiatric aspects, 97
- GILBERT, R. E., 236
- GRAHAM, J. B., 63
- Greenwood-Yule method, 9
 - modified, 10
- Hageman factor, 64
- hemoglobin:
 - A, 138
 - C, 138
 - sickle cell, (S) 138
